

DID YOU KNOW?

On 1st May 2009, “*The Independent News*” claimed that forest is cleared in Malaysia to make room for oil palm plantations. The chart below clearly shows that oil palm plantations harvest the least land area as compared to other major oil crops. ***Oil palm occupies less than 7% of 176.8 million hectares of total harvested area and less than 1% of world’s 4.97 billion hectares of agricultural land area.*** Why were questions not raised on other crops?
